

Generator power of super large power station

Overview

What is the largest power station in the world?

At all times since the early 20th century, the largest power station in the world has been a hydroelectric power plant. More information Held record, Name of power station . More information Rank, Station . 1.

What is the largest power generating facility ever built?

As of 2025[update], the largest power generating facility ever built is the Three Gorges Dam in China, completed in 2012. The facility generates power by utilizing 32 Francis turbines for a total capacity of 22,500 MW. The eight largest power stations are also hydroelectric dams, beginning with Baihetan Dam, at 16,000 MW, also in China.

Is China's Fengning power station the world's largest hydro power plant?

China has set a new global benchmark in the global hydropower sector with the completion of the Fengning Pumped Storage Power Station, the largest of its kind in the world. China's Fengning Station: World's Largest Pumped Hydro Power Plant Sets New Global Benchmark.

What is the biggest power plant in the world?

The biggest power plant in the world and the largest dam in the world is Three Gorges Dam, located in the Hubei province of China. It's a hydroelectric gravity dam that spans across the Yangtze River with an installed capacity of 22,500 MW.

Generator power of super large power station

[List of largest power stations](#)

This article lists the largest power stations in the world, the ten overall and the five of each type, in terms of installed electrical capacity. Non-renewable power stations are those that run on coal, ...

[The national power load exceeds 1.5 billion kw! Superwatt generator](#)

Jul 21, 2025 · ? On July 16, the country's maximum power load exceeded 1.5 billion kilowatts for the first time, setting a new record! As high temperatures continue and economic vitality ...
