

German substation UPS uninterruptible power supply

Overview

Why do we need an uninterruptible power supply (UPS) system?

In data centres, traffic control centres, on sensitive production lines and in many other fields, systems for the uninterruptible power supply (UPS systems) save lives and secure data, avoid costs, ensure order, protect infrastructures, and prevent situations arising that can threaten livelihoods.

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

What is a high power ups system?

UPS-Systems – Maximum Reliability Coupled with Low Cost of Ownership A trouble-free power supply is required wherever electrical energy must be available at all times and protection has to be provided against a temporary mains failure or mains disturbance. High Power UPS-Systems should have maximum reliability but a low cost of ownership.

What is NiCd uninterruptible power supply?

An nicd uninterruptible power supply industrial, modular and stand alone UPS from Germany from Europe is an uninterruptible power supply electrical source, industrial nicd UPS with battery as static high technology solution, is an electrical apparatus that provides emergency electrical power to your electrical load.
