# Gravity energy storage project in Italy

## Overview

---

Will Energy Vault & carbosulcis build a 100MW hybrid gravity energy storage project?

Energy Vault and Carbosulcis announce 100MW hybrid gravity energy storage project. Two firms, Energy Vault, and Carbosulcis, have announced a collaboration to build a 100-megawatt hybrid gravity energy storage project to accelerate the carbon-free technology hub at Italy's largest former coal mining site in Sardinia.

What is a 100MW hybrid gravity energy storage system?

The collaboration is to develop a 100MW Hybrid Gravity Energy Storage System, a solution designed by Energy Vault for underground mines, pairing their modular gravity storage and batteries. According to a press release by Energy Vault, the energy storage solution will be deployed 1640 feet (500 meters) deep mine shafts.

Who owns the 100MW energy storage system in Sardinia?

The 100MW energy storage system will be owned and operated by Energy Vault, and is key to increasing the local use of renewable energy in Sardinia while accelerating the formation of the Renewable Energy Technology Hub.

What is Energy Vault & carbosulcis energy storage project?

The storage unit will be developed with the use of VaultOS proprietary energy management software. Energy Vault and Carbosulcis announce 100MW hybrid gravity energy storage project.
