

Grenada outdoor portable power supply manufacturer

Overview

What type of power plug is used in Grenada?

In Grenada, the power plug sockets are of type G. The standard voltage is 230 V and the frequency is 50 Hz. A power plug adapter is needed if you're traveling from a country with a different plug type, such as Canada.

What is the supply voltage in Grenada?

In Grenada the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

Do I need a power adapter in Grenada?

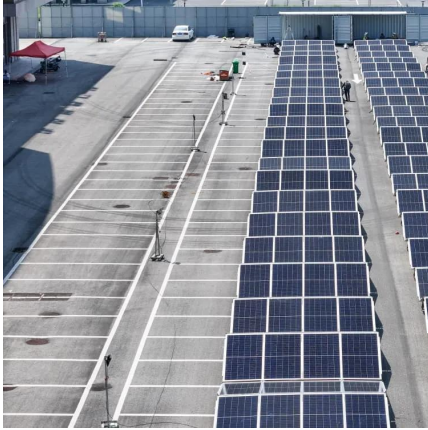

If your devices are compatible with these specifications, you will not need a power adapter. However, if your devices use a different plug type or are not compatible with the voltage in Grenada, you will need a power adapter and/or a voltage converter/transformer.

Should I use a surge protector when charging my devices in Grenada?

Always use a surge protector when charging your devices in Grenada to prevent damage from power fluctuations. When in Grenada, avoid using high-wattage devices (e.g., hair dryers, curling irons, and straighteners) without a proper voltage converter, as they can cause damage to your devices or the electrical system.
