

# **Guatemala energy storage exports**

## Overview

---

What is Guatemala's energy source?

This page is part of Global Energy Monitor 's Latin America Energy Portal. In 2018, Guatemala derived 57.43% of its total energy supply from biofuels and waste, followed by oil (29.54%), coal (7.68%), hydro (3.22%), and other renewables such as wind and solar (2.12%).

How much money does Guatemala export?

Guatemala's \$14.6 billion in exported goods translates to roughly \$800 worth of exports per resident. That dollar metric exceeds the average \$750 per capita one year earlier in 2023. The following export product groups represent the highest dollar value in Guatemalan global shipments during 2024.

Is biomass a source of electricity in Guatemala?

Traditional biomass – the burning of charcoal, crop waste, and other organic matter – is not included. This can be an important source in lower-income settings. Guatemala: How much of the country's electricity comes from nuclear power?

Nuclear power – alongside renewables – is a low-carbon source of electricity.
