

High-efficiency customized mobile energy storage containers for scientific research stations

Overview

- Mobile energy storage technologies are summarized.••.

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is large-scale mobile energy storage technology?

Large-scale mobile energy storage technology is considered as a potential option to solve the above problems due to the advantages of high energy density, fast response, convenient installation, and the possibility to build anywhere in the distribution networks .

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);
