# High frequency inverter 12000w

## Overview

---

What is a 1200W micro inverter?

A 1200W micro inverter is a grid-tie solar inverter with 1200W power output. It features 433MHz wireless communication, wide input voltage range (22-50V DC), IP65 waterproof design, built-in high-performance MPPT function, and high efficiency.

What is a high frequency inverter?

A high frequency inverter is a type of UPS (Uninterruptible Power Supply) that uses a microprocessor as its process control center. It employs software programming to control its operation, unlike traditional analog circuits.

What voltage options does the inverter offer?

**Multiple Voltage Options:** The inverter provides flexibility with voltage options of 220V, 230V, and 240V, ensuring compatibility with various international standards and your specific needs.

Does a 12V inverter automatically disconnect a power supply?

An inverter with a 12v input, if voltage is lower than 10.5v or higher than 15v. will automatically disconnect the power supply for protection. An inverter with a 24v input, if voltage is lower than 20v or higher than 30v. will automatically disconnect the power supply for protection.
