

High-voltage solar-powered containerized oil platform

Overview

Why are oil and gas companies adopting offshore solar and hybrid power systems?

Oil and gas companies are adopting offshore solar and hybrid power systems, overcoming challenges with new technological advancements. As the global push for renewable energy intensifies, oil and gas companies are increasingly exploring solutions to transition from fossil fuels to more sustainable energy sources for supporting their operations.

Which offshore platforms use hybrid power systems?

Shell operates 13 offshore platforms that use hybrid power systems. Of these, eight monopile platforms, including Caravel, Cutter, L09- L13-FI-1 and Shamrock, use a solar-wind hybrid system. Such systems do not produce any direct greenhouse gas emissions in normal operation.

Which offshore wellhead platforms use hybrid power systems?

Oil and gas operators use offshore solar power to power their offshore wellhead platforms. For example, in the North Sea, Shell operates 13 offshore platforms that use hybrid power systems. Of these, eight monopile platforms, including Caravel, Cutter, L09- L13-FI-1 and Shamrock, use a solar-wind hybrid system. Such systems do not produce any direct greenhouse gas emissions.

How can offshore solar power help oil and gas companies?

Offshore solar power systems can help oil and gas companies meet stringent greenhouse gas reduction targets and comply with international climate agreements and national regulations aimed at reducing emissions from the sector.
