

How big is the solar tile glass

Overview

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

How long do solar tiles last?

The lifespan of solar tiles is 25 to 30 years. Steel roofing tiles and sturdy, durable glass solar tiles are used to construct solar roofs, which also come with sizeable warranties. Solar shingle installation can take up to a week. However, with routine maintenance, solar tiles can last longer than the typical 25–30 years.

What is a goodwe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

Are solarplexus glass tiles a good choice?

A great advantage of SOLARplexus glass tiles is the simple and fast assembly – from bottom to top – on a standard supporting batten. The roof can still be walked on and the simple plug-in system makes mounting or replacing easy. The SOLARplexus tiles are the perfect weather resistant energy supplier and also a timeless design element.
