

# How long does it take for a solar system to pay back

## Overview

---

How long does it take a solar system to pay off?

The average solar payback period for EnergySage customers is currently just over seven years. However, without the federal tax credit, that same system would take over 10 years to pay for itself. Here's what you need to know about how long it's likely to take you to break even on your solar energy investment—and why timing matters.

What is a solar panel payback period?

The solar panel payback period is the time it takes for your energy bill savings (and any export earnings) to offset the initial installation cost. After this point, the system effectively generates free electricity, delivering long-term financial and environmental benefits.

How much money can you get back on solar panels?

The federal residential clean energy credit, for example, gives you up to 30% back. Your state might also have additional incentives. Those credits can lop off a significant chunk of the money you pay for solar panels, making your payback period shorter.

What is the average payback period for solar panels in the UK?

In 2025, the average payback period for solar panels in the UK is estimated to be between 8 and 14 years, depending on system cost, household consumption, and available sunlight. **START THE PAYBACK PERIOD SOONER RATHER THAN LATER, APPLY FOR SOLAR NOW!**

1. Installation Costs
