

# How long does the solar water pump last

## Overview

---

How long does a solar water pump last?

A well-installed and maintained water pump can last anywhere between 10 to 20 years, and it's not uncommon to encounter solar pumps that are over 30 years old. The longevity of your pump will largely depend on its usage, maintenance, and the quality of installation. To get the most out of your solar water pump, you need to maintain it.

What makes a solar water fountain pump last?

Corrosion resistance is invaluable to the longevity and integrity of a solar water fountain pump. The solar-powered fountain pump will be spending a lot of time around or in water, and without some form of corrosion resistance, it won't be long before it goes bad.

How long does a water pump last?

Some customer are running the pump 24/7, 7 days a week which will shorten the observed lifetime of the system. The vast majority of our customer are using the pumps 6-8 hours per day, or intermittently, which is normal use and should result in a normal lifespan.

Are solar water pumps worth it?

Absolutely! Solar water pumps are known for their reliability over the years. With fewer moving parts compared to traditional pumps, they require less maintenance. Plus, with solar panels lasting 25-30 years, you're looking at a long-term solution for your water supply needs.
