

How long is the warranty period for the battery management system BMS

Overview

At BMS all of our car batteries online are covered under a warranty between 4-5 years, this can be found under the specifications on the product page. What is battery management system (BMS)?

Battery Management System (BMS) is the “intelligent manager” of modern battery packs, widely used in fields such as electric vehicles, energy storage stations, and consumer electronics.

What is a BMS used for?

A Battery Management System (BMS) is widely used in various applications such as electric vehicles (EVs), energy storage systems (ESS), uninterruptible power supplies (UPS), and industrial battery applications.

How do battery management systems work?

Battery management system (BMS) is technology dedicated to the oversight of a battery pack, which is an assembly of battery cells, electrically organized in a row x column matrix configuration to enable delivery of targeted range of voltage and current for a duration of time against expected load scenarios.

What is a solar energy storage system (BMS)?

solar energy storage. It ensures the battery operates safely and efficiently, maximising lifespan and performance. The BMS checks the charge status and battery health and balances the voltages between cells.

How long is the warranty period for the battery management system
