

How many Nordic solar panel manufacturers are there

Overview

As of January 2023, there were 54 solar module manufacturers in the European Union and Norway. In total, the solar module manufacturing capacity in the region stood at 9.2 gigawatts. Can solar energy thrive in the Nordics?

Solar energy in the Nordics is gaining serious momentum. With increasing installations and ambitious targets, the region proves solar can thrive even in northern climates. The rapid progress across these countries sets a clear path for solar to become a key pillar in their renewable energy future.

Which Nordic countries are embracing solar PV technology?

During the recent surge in solar PV installations, the Nordic countries – Sweden, Norway, Finland, and Denmark – have increasingly embraced solar PV technology, defying their northern geographical challenges.

Why should I join Nordic solar?

Joining Nordic Solar means building a career with exciting opportunities. You will find a space to grow, learn and engage in a collaborative environment. Battery Energy Storage Systems (BESS) are the perfect complement to solar energy, which is one of the most predictable and cost-efficient renewable energy sources available.

How much solar power does Norway have?

The Norwegian Water Resources and Energy Directorate (NVE, 2024) reported a total installed capacity of around 0.6 GW by the end of 2023. About half of the capacity is installed on households - the rest for industrial and commercial use, with a very limited Utility scale solar.
