How many levels are there for solar panels

Overview

What are the different tiers of solar panels?

Based on the solar panel quality, they are differentiated as Tier 1, Tier 2, and Tier 3 solar panels. Each of these tiers has different features. They are primarily used as a way for customers to know the effectiveness of their solar panel purchase. Let us now dive deep into the properties of each of these different tiers of solar panels:.

How to choose the best solar panel?

Another essential aspect that will help you choose the best solar panel is having an adequate amount of knowledge of the different tiers of solar panels. Solar panels are categorized into different tiers (Tier 1, Tier 2, and Tier 3) based on their manufacturing quality and reliability, with Tier 1 panels being the highest quality and most reliable.

Are Tier 1 solar panels better than Tier 2?

In-house manufacturing, research and development, and automation can all be associated with the quality of the solar panel. While some defects are unavoidable, Tier 2 and 3 panels have a much higher rate of failure than Tier 1 panels. Harvest Energy Solutions only uses Tier 1 panels when installing a solar array.

What are Tier 2 solar panels?

‘Tier 2 solar panels’ is a term that’s used to describe all solar panels that are not Tier 1. BloombergNEF only created criteria used to identify Tier 1 solar companies. As such, there are no official lists of Tier 2 or Tier 3 solar companies.
