How much does an 8 kilowatt solar panel cost

Overview

What is the cost of an 8 kW solar system?

An 8 kW solar panel system costs $20,720 in 2025 before incentives. This system produces about 11,614 kWh of electricity annually, but the exact amount depends on your location and sunlight. Don't miss out on the federal solar tax credit ending December 31, 2025, which offers 30% savings.

How many solar panels do you need for an 8 kW system?

8 kW solar panel systems generally use between 20 and 22 solar panels and require about 390 square feet of roof space. The number of solar panels you need for an 8 kW system depends on the power rating of the panels. For example, you would need about 23 panels if you used 350 watts.

How much energy does a 8 kW solar system produce?

An 8 kW solar panel system will produce an average of 700 to 1,400 kWh of electricity per month, depending on your exact home and where you live. One of the biggest factors in how much energy solar panels produce is the amount of sunlight your roof gets.

How much does an 8 kW solar system save?

An 8 kW solar system can save about $150 on your monthly electricity bill, based on the average electric rate in the U.S. That's nearly $1,800 per year in solar savings! The exact amount of money that an 8 kW solar system will save varies quite a bit from state to state.
