

# How much does it cost to be an agent for home energy storage

## Overview

---

Becoming a home energy storage agent typically requires \$15,000–\$65,000 in initial investment. How much does energy storage cost?

Electricity Energy Storage Technology Options: A White Paper Primer on Applications, Costs and Benefits. EPRI-1020676, Final Report, December 2010, Electric Power Research Institute, Palo Alto, California. RedT Energy Storage. 2018. “Gen 2 machine pricing starting at \$490/kWh.”.

What are energy storage technologies?

Energy storage technologies, store energy either as electricity or heat/cold, so it can be used at a later time. With the growth in electric vehicle sales, battery storage costs have fallen rapidly due to economies of scale and technology improvements.

Are battery electricity storage systems a good investment?

This study shows that battery electricity storage systems offer enormous deployment and cost-reduction potential. By 2030, total installed costs could fall between 50% and 60% (and battery cell costs by even more), driven by optimisation of manufacturing facilities, combined with better combinations and reduced use of materials.

Which energy storage technologies are included in the 2020 cost and performance assessment?

The 2020 Cost and Performance Assessment provided installed costs for six energy storage technologies: lithium-ion (Li-ion) batteries, lead-acid batteries, vanadium redox flow batteries, pumped storage hydro, compressed-air energy storage, and hydrogen energy storage.

## How much does it cost to be an agent for home energy storage
