# How much does it cost to install a solar container communication station battery

## Overview

---

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.

How much does a 4kwh solar battery cost?

The cost of an entry-level 4kWh solar battery (supply and install) is approximately £4,000. However, don't forget you'll also need to factor in the cost of an inverter (if needed). The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average.

How much does a solar system cost?

The downside is interest payments on the loan accrue over time to increase the overall cost of the system. For example, using the example from earlier, financing a 7.9 kW solar system and 12.5 kWh battery with a 20-year loan (with zero money down) would cost nearly \$47,000 while paying cash would cost around \$30,000.

Can you add battery storage to a solar panel?

The good news is that it's entirely possible to add battery storage to an existing solar panel setup. So-called "storage ready" systems are already equipped with an inverter that can easily direct excess power into a battery. But even if your system wasn't designed with storage in mind, you still have options.
