

# How much does it cost to invest in solar panels

## Overview

---

The average cost of installing an average-size home solar system in 2025 is \$29,360 before federal tax credits and incentives. How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

How much does a solar panel cost?

From 2010 to 2020, solar panel prices dropped by nearly 90%, with costs per watt falling from approximately \$3.86 to \$0.38 globally (source: IRENA). This decline slowed in recent years but remained consistent. Between 2020 and 2025, residential solar system costs, averaging \$2.50 to \$3.50 per watt in 2025, decreased from \$3 to \$4 per watt in 2020.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.

Are solar panels a good investment?

Installing solar panels can be one of the most impactful improvements you can make - allowing you to take control of electricity bills, protect your home from outages and increase the value of your property while producing energy directly on the roof. How much does it cost to install and manage solar panels?
