How much does a solar inverter cost?

The inverter is a crucial part of your solar investment, whether you're on the grid or building an off-grid solar system. Expect to pay \$1,000 to \$3,500, depending on type, size, and features.

What is the relative cost of solar energy?

Another measure of the relative cost of solar energy is its price per kilowatt-hour (kWh). Whereas the price per watt considers the solar system's size, the price per kWh shows the price of the solar system per unit of energy it produces over a given period of time. $\text{Net cost of the system} / \text{lifetime output} = \text{cost per kilowatt hour}$.
