

How much is a solar panel per watt in Northern Cyprus

Overview

How much do solar panels cost in Cyprus?

Below, we've prepared an approximate guide to the costs of different solar panel system sizes, including the potential yearly savings and the estimated payback period. These numbers are based on average installation prices in Cyprus and an electricity rate of around €0.30/kWh.

What is a commercial photovoltaic system in Cyprus?

Commercial photovoltaic systems in Cyprus are usually used by businesses for self-consumption. That is, the energy generated by the solar panels is solely used for the building where the panels are installed.

How much energy does a 10kW solar system generate in Cyprus?

A 10kW system with monocrystalline panels may generate around 16,000 kWh per year in Cyprus. The same 10kW system with HJT panels can generate 10-15% more energy annually - that's up to 20,000 kWh per year. Over 25 years, this results in an additional 60,000+ kWh of free solar electricity, significantly reducing your electricity bills.

What are solar panels used for in Cyprus?

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.
