What is battery ESS?

Y STORAGE SYSTEMS2.1 IntroductionBattery ESS (“BESS”) is an electrochemical ESS where stored chemical energy can be converted to electrical energy when required. It is usually deployed in modularised container and has less geographical restrictions.

Why should you choose a lithium-ion battery (ESS)?

As a result, the ESS makes it possible to make the most of the energy generated by renewable sources, reduces dependence on the traditional electricity grid and even helps to save money on electricity bills. In the context of energy storage systems (ESS), BYD is one of the global leaders in lithium-ion battery solutions.
