How to connect the external power supply of the base station

Overview

How do I connect a base station to a network?

1. Connect the base station power and the network using method a or method b. a. AC Power Option b. PoE (Power over Ethernet) Option If you choose method a, use Yealink supplied power adapter (5V/0.6A). A third-party power adapter may damage the base station. If you choose method b, you do not need to connect the power adapter.

How do I connect a base station to an external reference?

If an external reference is required, enable the external reference "Absent" alarm (Configure > Alarms > Control). Use a 50: coaxial cable (RG58 or RG223) to connect the external reference to the base station's external reference frequency input. You can daisy-chain up to eight base stations using F-junctions.

How do I set up a base station?

Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna.

How do I connect a PC to a base station?

Remove the local area Ethernet connection and connect an Ethernet patch cable between the PC and the base station. You can use either straight through or crossover Ethernet patch cable with the current base station firmware. Click Start > Settings > Control Panel. Double-click Network Connections.
