

How to cut off the power supply of outdoor rooftop solar energy

Overview

Are solar panels off the grid?

Some people might think because they've unplugged the panels, they might be "off the grid," but that's not true. You're off-grid only if you have a separate system installed with batteries. Most homeowners are grid-tied, meaning you pull energy from the power company. This system is called Net Metering (NEM).

How do you turn off solar power?

Disconnect In the Early Evening: Solar energy is produced from the sun and can't be "turned off." Because the sun is still generating electricity, you work with a "live wire" daily. Disconnect DC and AC Switches: Most systems have two circuit breakers – the AC and DC. The AC side, which stands for alternating current, must be turned off first.

How to safely shut down a solar PV system in an emergency?

After removal, clean the panels using a soft cloth and a mild detergent. Store the solar panels away from direct sunlight. Place them flat to prevent warping or damage during storage. You need to know how to safely shut down a solar PV system in an emergency.

Can you shut off solar panels?

You can't simply "shut off" solar panels like traditional electrical appliances. We recommend performing the disconnection early in the evening or before sunrise for maximum protection. Before starting the disconnection process, shut off the DC and AC circuit breakers so there's no electrical load connected to the solar panels.
