

LLSE CONTAINERS

# How to replace the container solar panel battery

## Overview

---

How do batteries connect to a solar panel?

There are three main types of connection patterns that allow for batteries to be connected to a solar panel. Two or more similar batteries are used to connect solar panels and batteries in parallel. The identical positive poles must be linked to each other with positive to connect the batteries in parallel.

Can you put solar panels on a container?

We put solar panels on a container for a guy who was powering an RV on his land. He had a generator, and the container was full of batteries to support himself. When we're on top of a container, we need to build a custom racking system to hold up more than one row of panels, which what we ended up doing for him. (See in image with tan container.).

How do I replace the battery in my solar panel?

To replace the battery in an Allsop Home & Garden solar panel, unscrew the screws and separate the two halves of the solar housing compartment. Remove the old battery and replace it with a new rechargeable battery. Insert the screws back into their holes and screw the two halves of the solar housing compartment back together securely.

What should I connect between my solar panel and the battery box?

You cannot connect your solar panels directly to the battery box, as the current could be too strong and damage your battery. To prevent this, you need to ensure there is a solar regulator connected between the solar panel and the battery box.
