

# **How to sign a maintenance contract for a solar container communication station inverter**

## Overview

---

What is a solar PV operation & maintenance contract?

A solar pv Operation and Maintenance (O&M) contract ensures the long-term performance, efficiency, and safety of the photovoltaic (PV) installation. This contract outlines routine maintenance, fault detection, and necessary repairs required to keep the system functioning optimally. Think of our O&M contract as a health check for your solar system.

How do I maintain my solar PV system?

Maintenance includes: Checking for accumulated dust, bird droppings, or debris that may reduce efficiency. Recommending a professional PV module cleaning service where necessary. Additional Cleaning Service: A dedicated Solar PV Clean service may be offered upon request, particularly for systems in shallow pitch or dusty environments.

What does a PV inverter contract cover?

The inverter is a critical component of the PV system, requiring proper mounting and ventilation to operate efficiently. The contract covers: Checking if the inverter is securely mounted and free from movement. Ensuring ventilation is unobstructed, with operational fans and heat sinks.

Can a provider sell a photovoltaic system to a customer?

WHEREAS, Provider has offered, at his sole cost and expense, to install, maintain, own, replace, repair, and operate a photovoltaic system at one or more of the Property (ies) and to sell Solar Services (as hereafter defined) produced by the solar photovoltaic system to Customer as provided in and subject to the provisions of this Agreement.
