

Huawei Funafuti power storage vehicle price

Overview

Does Huawei have a sulfide battery?

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.

Will Huawei's new battery revolutionise China's electric vehicle landscape?

Huawei's recent unveiling of a revolutionary solid-state battery, promising a remarkable 1,864-mile range with a mere five-minute charge, is poised to redefine the electric vehicle landscape and elevate China's standing in the global race for sustainable energy solutions.

Will Huawei's new lithium-ion battery disrupt the booming solid-state battery sector?

This recent patent application, reported by CarNewsChina, signals Huawei's aim to disrupt the booming solid-state battery sector. The patent details a battery with an energy density of 400 to 500 Wh/kg, potentially tripling that of standard lithium-ion cells. Huawei's tech tackles a key challenge: electrochemical stability.

What is Huawei's new solid-state battery patent?

Huawei's recent announcement of its solid-state battery patent is a significant milestone. Filed in June 2025, this patent promises a battery capable of delivering a staggering 1,864 miles on a single five-minute charge. This advancement is attributed to an energy density between 400 and 500 Wh/kg, nearly double that of current batteries.
