

Huawei Kingston Energy Storage solar Project

Overview

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to the grid in Ngari prefecture, Southwest China's Xizang autonomous region. Will Huawei fusion solar power Red Sea city's off-grid energy needs?

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. The Red Sea Project, a key part of Saudi Vision 2030, is now the world's largest microgrid with 1.3GWh storage capacity.

What is Huawei fusion solar smart string energy storage solution (ESS)?

Central to this vision is Huawei's FusionSolar Smart String Energy Storage Solution (ESS). This solution will enable the Red Sea Project to independently meet its power needs. The microgrid solution addresses the intermittent and fluctuating nature of solar and wind power. It ensures the safe and stable operation of renewable energy systems.

What is Huawei doing in Asia-Pacific?

Meanwhile, in Thailand, Huawei built Asia-Pacific's largest single-site C&I PV and ESS plant at Mahidol University, including a 12 MW PV system and a 600 kWh ESS. "Huawei's smart string and grid-forming ESS solution significantly improves a power grid's ability to integrate renewable energy," Xing explained.

Is Huawei the leading solar inverter vendor in 2022?

Huawei's dominance in the renewable energy sector is further evidenced by its position as the leading global solar photovoltaic (PV) inverter vendor in 2022, with a 29 percent market share, according to Wood Mackenzie.
