

# **Huawei s large-capacity solar container battery factory in Rotterdam the Netherlands**

## Overview

---

Why are batteries so important in the Netherlands?

Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries. This is because batteries in the Netherlands have to pay to take power from the grid.

What are Huawei's intelligent lithium battery solutions?

Huawei's intelligent lithium battery solutions provide dynamic peak shifting, transforming traditional backup power systems into efficient energy storage solutions that enhance system flexibility and reliability.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.

Is this the Netherlands' first homegrown battery?

Karen de Lathouder, COO Assets Eneco : “It’s fantastic that we can invest in this new battery, which is a breakthrough after years of development. At the same time, it’s a shame that this is only the Netherlands’ first homegrown battery.
