What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Why should you choose a containerised generator?

Fire Detection Panels and Intruder Alarms: Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: Super Silent: Super silent 65dBA at 1m for prime power running diesel and gas. Critical Backup Power: For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

Why should you use ISO 6346 container standards?

Use of ISO-6346 container standards allows maximum flexibility. Power supply comes from a cable connection to the grid, or from suitable generators, at low or medium voltages. A wide range of high voltage, CW DC, pulsed or modulated waveform outputs can be provided. The entire system is made to be entirely weatherproof.

What is container type diesel generator set?

Container type Diesel Generator Set Jet power supply container type generator set is design in accordance with ISO/TC104 standard size, rational construction, to make sure the generator set will not be damaged due to under high pressure in transport, and is suitable for ship transportation.
