

# **Iceland replaces energy storage charging station system**

## Overview

---

How to locate charging stations in Iceland?

Charging stations in Iceland are easily located with a vehicle's navigation system or with Google Maps. They are available all around the country, and if you are driving along route 1 Ring road, they can be found along the way.

Does Iceland have EV charging infrastructure?

In 2018, a major milestone was reached in Iceland's EV charging infrastructure, when the ring road (Route 1) was covered by DC fast charging stations with a distance of within 100 km between each station.

What type of Charger do EVs use in Iceland?

EVs in Iceland generally use the European standard Type 2 (Mennekes) connector and CCS Combo Type 2. Some older vehicles use Type 1 (J1772) and CHAdeMO. As of 2022, there are over 445 charging stations in Iceland, including 89 DC fast chargers (50-350kW power) and the remainder being AC (mostly 3-phase 22kW).

What is Iceland's Energy Strategy?

Iceland's energy strategy has had far-reaching economic benefits. By transitioning to renewables, the country has reduced import dependency, created green jobs, and attracted foreign investment. Energy-intensive industries, such as aluminum production and data centers, thrive due to low-cost, clean electricity.
