

India Mumbai monocrystalline silicon solar modules

Overview

How much does a monocrystalline solar panel cost in India?

In India, monocrystalline solar panels are available in a panel efficiency range of 17%, 18% and 19%. The price of monocrystalline solar panels with 17% efficiency and a watt range of 250-above 300 W is Rs 47 per Wp. In the case of 18% efficient solar panels, the prices are Rs 48 per Wp for 250-300 W and Rs 50 per Wp for panels above 300W.

What is a monocrystalline solar panel?

A monocrystalline solar panel, also called a mono solar panel is a semiconductor device composed of monocrystalline solar cells. It is a highly popular, advanced type of solar panel. It is manufactured in a monocrystalline solar panel factory from a cylindrical silicon ingot produced from a singular crystal of high purity silicon.

What determines the monocrystalline solar panel price?

The monocrystalline solar panel price is determined by its silicon structure, electrical protection, and wiring. While producing monocrystalline solar panels, the solidification of monocrystalline silicon needs close attention and care. That is why the monocrystalline panel price is comparatively higher.

How do n-type monocrystalline solar panels work?

In n-type monocrystalline solar panels, a phosphorus coating is applied on the wafer, which induces the current flow. The n-type monocrystalline solar panel does not suffer from light-induced degradation. Moreover, these panels experience no efficiency or power output decline over time.
