

Installation of container generator set

Overview

What is a containerised generator set?

On a regular basis, containerised generator sets (CGS) are placed on board ships to provide replacement power in case of a damage to one of the ship's generator sets, or additional power, e.g. to provide power to extra deck equipment or reefer containers. There are currently no clear rules and requirements for such time limited installations.

Is permanent installation of containerised generator sets covered by this guideline?

Permanent installation of containerised generator sets are not covered by this guideline. App.A provides a tabularised summary of all requirements, for ease of reference.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

How do you install a generator set?

Connect the generator set to a lifting device and crane. Move and align the generator set with the concrete mounting studs. Install attaching hardware (washer, lock washer, nut). Fuel generator tanks. Connect generator output to the Automatic Transfer Switch (ATS). 22 GPH at 25% load ÷ 1600 gallons = 72 hours of operation.
