

Iranian household energy storage power supply manufacturer

Overview

What is Iran's energy supply?

In 2020, the Total Energy Supply (TES) in Iran was predominantly derived from natural gas (69%) and oil (29%), with nuclear power and renewable sources contributing only 1% each. Despite the heavy reliance on fossil fuels, Iran possesses significant potential for renewable energy.

What types of energy storage systems does Jinko power offer?

Depending on application scenario, Jinko Power provides all types of customers with tailored energy storage system solutions, including power energy storage system integration solutions, industrial and commercial energy storage system integration solutions, and household energy storage systems.

What makes a good energy storage company?

1. 20 years professional energy storage design and integration capabilities. 2. R&D, design and debugging professional technical team 3. Group corporate structure, Stable revenue capacity of 100 million, sufficient investment in R&D and technology funds 4. Complete QC, QMS system, fast delivery capability.
