

Is American glass related to solars

Overview

What is the demand for solar glass?

Andries Wantenaar, from market intelligence company Rethink Technology Research, said that "demand for solar glass is looking robust." "We're excited about the potential for domestic solar manufacturing growth to provide jobs and R&D development in the US," Solarcycle Chief Operating Officer (COO) Rob Vinje told pv magazine.

Is glass-glass a trend in solar modules?

Researchers at the US Department of Energy's (DOE) National Renewable Energy Laboratory (NREL) are looking into the trend toward glass-glass regarding module durability.

Why does China dominate the solar glass market?

China dominates the solar glass market due to its high share of production and the energy-intensive nature of glass manufacturing. Wantenaar estimated that China holds 'around 90%' of the solar glass market, which is higher than its 80% PV module share.

Why are solar glass suppliers investing in new production capacity?

As PV module capacity increases, glass suppliers are investing in new solar glass production capacity. New facilities are popping up in North America, with unique features to ensure competitiveness, such as using recycled material.
