

# Is solar air conditioning necessary in Moldova

## Overview

---

How many MW of wind and solar energy is installed in Moldova?

, deployment of wind and solar energy in Moldova has been very slow. As of 2022, only 97.9 MW of renewable capacity for electricity generation was installed. Figure 1. Installed electricity generation capacity by type: 441.4 MW / 13% Non-renewable: 441.4 MW / 79% Renewable Energy Potential. The Republic of Moldova features great potential.

What drives the energy policy agenda of the Republic of Moldova (Moldova)?

The energy policy agenda of the Republic of Moldova (Moldova) is driven by several interrelated factors. The first key driver is high dependence on imports from limited sources and subsequent energy security considerations.

Does Moldova have a good energy sector?

Moldova is also on the right path to developing a sound institutional structure in the energy sector, informed by better statistical data. The National Bureau of Statistics (NBS) is commended for its efforts to improve energy data collection and reporting.

What is Moldova's energy self-sufficiency?

Moldova's energy self-sufficiency is among the lowest in the world: only around 25% of its energy demand is covered by domestic production, consisting almost entirely of solid biomass and variable renewable energy sources.
