

# **Jerusalem energy storage export**

## Overview

---

When will energy storage facilities be built in Israel?

(3) The Electricity Authority will publish a tender in September 2023 for the establishment of Energy Storage facilities with a total capacity of 900MW. Israel plans to use its abundant gas resources to leverage the development of a gas-based auxiliary industrial sector.

Does Israel export natural gas?

Other than supplying Israel's domestic natural gas demand, the export market for natural gas produced in Israel is growing significantly. Total exports of natural gas from Israel in 2022 increased by 29% compared to 2021. Of the total exports, exports to Egypt grew by 37%, and exports to/via Jordan grew by 16%.

How does Israel respond to electricity consumption forecasts?

In light of these challenges, the Government of Israel is promoting several programs to respond to electricity consumption forecasts, while reducing pollution and increasing the use of natural gas and renewable energy.

How much solar power does Israel need?

To reach this new goal, Israel will need to increase its overall installed capacity from solar systems to 17.1 GW (almost 3.5 times of its capacity in 2022- 4.7 GW). It will also need to increase overall storage capacity by 10 times from 300 MW in 2020 to approximately 3,000 MW in 2030.

## Jerusalem energy storage export
