

Korea Busan power battery bms standard

Overview

South Korea's new KC 10031 standard addresses safety for reusable secondary batteries in appliances. Learn about requirements for BMS, testing, and more. How big is the South Korea battery management systems market?

The Market Size is Growing at a CAGR of 14% from 2022 to 2032. The South Korea Battery Management Systems Market Size is Expected to Hold a Substantial Share by 2032. The South Korea Battery Management Systems Market Size is Expected to Hold a Substantial Share by 2032, at a CAGR of 14% during the forecast period 2022 to 2032. Market Overview.

Will South Korean battery management systems upscale the demand for energy storage systems?

Presently, the market has reached pre-pandemic levels. Over the long term, South Korean battery management systems (BMS) are likely to have an upscaled demand due to their functional safety for the better performance of battery packs and the growing demand for energy storage systems in the country.

What is the segmentation of South Korea battery management systems market?

Based on the application, the South Korea battery management systems market is segmented into automotive, consumer/industrial handheld devices, and energy. Among these, the automotive segment has a significant revenue share over the forecast period.

What is the outlook for South Korea battery management systems market in 2022?

In 2022, the lithium-ion segment is expected to grow at a significant CAGR over the forecast period. Based on the battery type, the South Korea battery management systems market is segmented into lithium-ion and lead-acid. Among these, the lithium-ion segment is expected to grow at a significant CAGR over the forecast period.
