

Large-scale solar panels in Western Europe

Overview

What is the solar energy landscape in Europe?

The solar energy landscape in Europe has rapidly evolved, positioning the continent as a significant player in global renewable energy production. As of 2023, the European Union (EU) boasts a total installed solar capacity of approximately 263 gigawatts (GW), making it the second-highest region in the world for solar power capacity.

Who are the best solar companies in Europe?

1. Acciona SA (Spain) Acciona SA is a global leader in sustainable infrastructure solutions and has carved out a prominent niche in Europe's renewable energy landscape, particularly in the solar sector.

How big is Europe's solar market?

The European solar market is experiencing unprecedented growth, with installations projected to reach 87GW annually by 2025. Driven by the REPowerEU plan and ambitious carbon neutrality targets, the continent is accelerating its transition to renewable energy.

Which countries install the most solar panels in Europe?

Germany has regained its position as the leading country for solar installations in Europe, adding 14.1 GW in 2023. Following Germany, Spain and Italy have also made significant contributions, with 8.2 GW and 4.8 GW installed respectively. Poland and the Netherlands round out the top five with 4.6 GW and 4.1 GW, respectively.
