

# **Latest energy storage facility planning scheme**

## Overview

---

The “Special Action Plan for Large-Scale Construction of New Energy Storage (2025-2027)” released by the National Development and Reform Commission (NDRC) and the National Energy Administration (NEA) outlines a roadmap to scale up energy storage to support the country’s rapidly expanding renewable energy capacity. What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What is the 'Special Action Plan' for new energy storage?

The ‘Special action plan for large-scale construction of new energy storage (2025-2027)’ was published last Friday (12 September), formulated jointly by the country’s National Development and Reform Commission and National Energy Administration (NEA).

Will China develop new energy storage systems between 2025 and 2027?

BEIJING, Sept. 12 -- China on Friday unveiled an action plan to promote the development of new forms of energy storage between 2025 and 2027, amid efforts to support green energy transition and ensure the stability of new-type power systems.

What is China's Energy Storage plan?

The plan’s target represents a significant scaling up, even for the world’s leading adopter and producer of energy storage technologies. According to official National Energy Administration data from its recent ‘China new energy storage development report 2025,’ the country’s installed base at the end of 2024 totalled 73.8GW/168GWh.
