

Latest news on ASEAN power grid energy storage companies

Overview

How much capacity could be avoided with ASEAN Power Grid integration?

Enhanced integration through the ASEAN Power Grid could avoid adding 154 MW of capacity, saving \$1.87 billion, by 2025, according to a 2010 study cited by the ASEAN Centre for Energy. ASEAN's vision is to integrate the national power systems of its 10 member states to enable power trade.

What is the ASEAN Power Grid (APG)?

The ASEAN Power Grid (APG) is an initiative to build interconnections to connect the power grids of different ASEAN Member States (AMS) and facilitate power trade among them. Its ultimate aim is to create an integrated Southeast Asia power grid system.

What is the first step towards the ASEAN Power Grid?

The first step towards the ASEAN Power Grid is the signing of the Sabah-Sarawak Power Interconnection Power Exchange Agreement between SESCO, a subsidiary of Sarawak Energy Bhd, and Sabah Electricity Sdn Bhd. This agreement paves the way for establishing the Borneo Grid and the ASEAN Power Grid.

What kind of infrastructure is needed for the ASEAN Power Grid?

Building the ASEAN Power Grid entails the development of hard and soft infrastructure, including transmission facilities and electricity trading mechanisms.
