

Lithium-ion batteries for solar container communication stations in Pristina

Overview

What are the lithium-ion batteries in containers guidelines?

The Lithium-ion Batteries in Containers Guidelines that have just been published seek to prevent the increasing risks that the transport of lithium-ion batteries by sea creates, providing suggestions for identifying such risks and thereby helping to ensure a safer supply chain in the future.

Are lithium batteries shipped in a container?

There are three packaging categories for lithium batteries if they are being shipped in a container. When shipping lithium batteries, it is crucial to check the rules and regulations ahead of transportation, or work with an experience shipping partner to ensure that your cargo is shipped following best practices.

How to secure a lithium battery container?

Segregation: It is recommended to segregate lithium battery containers from those containing other dangerous goods, particularly flammables, by at least one container bay (6 meters). Securing: All cargo must be secured within its container and on the vessel in accordance with the CTU Code and the vessel's Cargo Securing Manual.

How many lithium-ion batteries can be sent by air?

If not inside a device like a smartphone, the batteries must be in a hard cased container. There are restrictions as to how many lithium-ion batteries can be sent within separate containers by air. Only a maximum of four can be sent, with two per container, and each battery must have a rating of below 100 watts per hour.
