Lithuanian grid-connected inverter manufacturers

Overview

Can Lithuania map out PV manufacturing to 2030?

The goal is simple: to map out PV manufacturing out to 2030 and beyond. Lithuania passed legislation to limit the ability of Chinese inverter manufacturers to remotely access the country's solar plants.

Will Lithuania install a solar PV system by 2030?

Lithuania is seeking to install 5.1GW of solar PV capacity by 2030 under its National Energy and Climate Plan (NECP), which was updated last year. European solar trade bodies have previously called for greater cybersecurity strategies as digital infrastructure and data become increasingly important in the development of physical energy resources.

When will Lithuanian power plants be able to run a 100kW power plant?

From 1 May 2025, operators of new Lithuanian power plants over 100kW in capacity will have to ensure that additional safeguards are in place for the information management systems and inverters at their sites. Existing sites will have to meet the requirements by 1 May 2026.

Why did 79 Lithuanian MPs vote on the Electricity Law?

According to Lithuanian reports, 79 MPs voted in favour of the amendment to the Law on Electricity, which will impose greater security measures on electricity generation and information management systems to insulate them from the influence of "hostile countries", as designated by the country's National Security Strategy.
