Why should you invest in a PV-Bess integrated energy system?

With the promotion of renewable energy utilization and the trend of a low-carbon society, the real-life application of photovoltaic (PV) combined with battery energy storage systems (BESS) has thrived recently. Cost-benefit has always been regarded as one of the vital factors for motivating PV-BESS integrated energy systems investment.

Why is cost-benefit important in PV-Bess integrated energy systems?

Cost-benefit has always been regarded as one of the vital factors for motivating PV-BESS integrated energy systems investment. Therefore, given the integrity of the project lifetime, an optimization model for evaluating sizing, operation simulation, and cost-benefit into the PV-BESS integrated energy systems is proposed.

Is PV-Bess a good investment compared to a pure utility grid?

The cost-benefit analysis reveals the cost superiority of PV-BESS investment compared with the pure utility grid supply. In addition, the operation simulation of the PV-BESS integrated energy system is carried out showing that how the energy arbitrage is realized.
