London Solar Home Storage

Overview

How to choose a solar energy system with home battery storage?

There are many factors to consider when purchasing a solar energy system with home battery storage. These include the location of the home, the roof pitch, local regulations, the energy needs of the home, the size of the system, the expected return on your investment, the choice of solar panels, and much more.

Why should you use solar energy storage?

Energy storage changes the rules – you can use the green, cheap energy you want, when you want it. Lower your bills, use greener energy, and be part of the solution to climate change with your solar power energy storage system.

Should you add solar energy storage to a residential property?

Adding solar energy storage to a residential property unlocks the flexibility to use energy in a whole new way. Never worry about whether your renewable generation is generating or your time of use tariff is off peak – just use the energy you want, when you want it.

How do I set up a smart solar energy storage system?

With EcoFlow PowerOcean, you can set up a smart solar energy storage system for your home and customise it to your needs. Through the EcoFlow app or the Web portal, you have instant access to real-time and historical solar and battery statistics, as well as features such as dynamic tariffs, TOU, solar surplus allocation, and backup reserve.
