

Long-life folding containers for chemical plants

Overview

How many litres can a chemical storage container hold?

The IBC for liquid chemicals has a 500 to 3,000 litre capacity. This chemical storage container has a base constructed from galvanized steel, aluminium or stainless steel, depending on your needs. We offer many customization options for the chemical container to ensure it adapts perfectly to your specifications and the constraints of your sector.

What are plastic containers used for?

The company's plastic containers are manufactured according to stringent international quality and safety standards, and are ideal for use in the chemical industry. These robust and reliable products are perfect for containing liquid and solid materials, like additives, solvents chemicals and cosmetics.

What are chemical storage containers made of?

Chemical storage containers made from durable plastic. Our containers are designed to safely store a wide range of chemicals, providing peace of mind for laboratory and industrial settings. We offer two options for our customers to choose from: premium weight and heavy weight containers.

How do duragreen® collapsible containers fold?

DuraGreen® collapsible containers fold easily, and their doors are made with fully articulating hinges that allow an open door to lay flat against the side of the container for tighter, safer storage.
