

# **Malaysia is doing energy storage projects**

## Overview

---

Are battery energy storage systems becoming a reality in Malaysia?

The utilities sector in Malaysia is witnessing significant advancements in battery energy storage systems (BESS), evolving from concept to reality with notable projects underway. The first large-scale BESS project is currently being constructed in Sabah, a pivotal development for the country's energy landscape.

Is Malaysia ready for energy storage?

(Photo: iStock) Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. The country's first four large-scale grid-connected storage projects have attracted significant interest, with more than 20 companies submitting over 30 proposals.

Are battery energy storage systems a keystone in Malaysia's Energy Transformation Story?

Battery energy storage systems (BESS), once relegated to the margins of policy discussions, are fast becoming a keystone in Malaysia's energy transformation story. As solar and other renewables take up greater shares of the generation mix, the national grid's growing complexity demands a reliable backbone, a role BESS is beginning to fulfil.

How many bids are there for battery storage projects in Malaysia?

KUALA LUMPUR (Aug 21): The bidding round for four large-scale, grid-connected battery storage projects in Peninsular Malaysia has attracted significant interest, with more than 20 industry players submitting over 30 bids, according to sources. The request for proposal, known as MyBeST, closed at the end of July.
