

# Mali offshore solar panels

## Overview

---

Who is building a solar plant in Mali?

The government of Mali has announced the construction of a 200 MW solar plant on 314 hectares in the southwestern part of the country. The Sanankoroba solar plant will be built by Russia's Novawind, which is the renewable energy division of nuclear group Rosatom.

Is Mali a good place to invest in solar power?

The analysis reveals that a significant portion of Mali's land area is well suited to solar PV (398.7 GW) and onshore wind (1.25 GW) development, with priority zones identified along existing and planned transmission lines and road networks.

Will Mali develop nuclear power in 2023?

In October 2023, Mali and Russia agreed to develop civil nuclear power, according to Voice of America (VOA). The construction of two additional 200 MW solar power plants near Bamako is set to begin on May 28 and June 1. The electricity sector in Mali heavily relies on imported fossil fuels for thermal production.

How much energy does Mali produce?

A May 2023 report by the United Nations Development Programme (UNDP) stated that in 2020, Mali had a production capacity of 1,024.92 MW, including 162 MW from self-producers – all thermal. Electricity production stood 2,577.44 GWh, comprising 69% thermal energy, 26.8% hydroelectricity, and 4.2% solar.
