

Maputo voltage stabilizer inverter manufacturer

Overview

What is em-Lite voltage stabilizer?

Our EM-Lite Voltage Stabilizer is the perfect solution for low cost applications, such as houses and small offices. Watford Control has been supplying Voltage Stabilizers and Power Conditioners to the African continent for over 50 years.

Where do stabilizers come from?

Whilst we supply to the entire African continent, we have significant installations in Ethiopia, Uganda, Nigeria, Egypt, Tanzania, Burundi and Zimbabwe to name a few, with the option of sourcing Stabilizers direct from the UK or via our Agents in certain countries.

Are Watford stabilizers easy to service?

When it comes to maintenance, our Stabilizers are robust and very quick and simple to service. The most common service item on electromechanical Stabilizers are the carbon brushes - not only are Watford Control brush sets very low cost, but they can also be replaced in minutes, as opposed to hours and sometime days with other systems!
