# Mauritius Grid Energy Storage Solution

## Overview

---

Why is battery energy storage system being introduced in Mauritius?

The CEB is introducing a Battery Energy Storage System (BESS) on its network to arrest the fluctuation inherent to Variable Renewable Energy (VRE) systems. This is due to the increasing share of VRE in Mauritius' energy mix, as the country's energy transition to a low carbon economy gains momentum.

Where can I find information on energy access in Mauritius?

Find relevant data on energy production, total primary energy supply, electricity consumption and CO2 emissions for Mauritius on the IEA homepage. Find relevant information for Mauritius on energy access (access to electricity, access to clean cooking, renewable energy and energy efficiency) on the Tracking SDG7 homepage.

How will Mauritius transition to a low carbon economy?

Mauritius is transitioning to a low carbon economy, with the Central Electricity Board (CEB) installing the first grid-scale Battery Energy Storage System (BESS). This is the first of its kind in Mauritius and enables high capacity storage of renewable energy in the grid.

Is the energy strategy in Mauritius sustainable?

The energy strategies in Mauritius, which have been demand-driven without incentives to reduce demand, can no longer be sustainable. It is the duty and responsibility of the Government to work towards decreasing carbon dioxide emissions in light of environmental issues.
