

Minimum specifications of Huawei energy storage equipment

Overview

What is Huawei smart string energy storage system?

With Huawei Smart String Energy Storage System, you can power your life by green power storage and be astonished by its admirable performance. No matter nights, rainy days or unexpected blackouts off the grid, the solar power is always at your request as a real bank. The built-in optimizer independently manages each battery module.

What is energy storage system products list?

Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series.

What is energy storage safety?

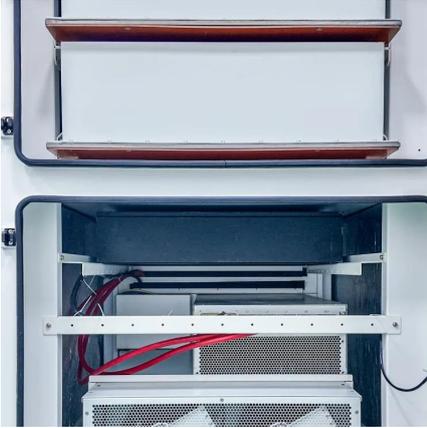

Energy storage safety weighs more than anything. With 4-layer protection from cell level to electrical level, structural level and emergency protection level, HUAWEI redefines energy storage system safety.

How long should power cables be between ESS and PCs?

The length of DC power cables between the ESS and PCS shall be 5-50 m. For details about the cable connections, see Figure 1-1, Figure 1-2, Figure 1-3, or Figure 1-5. The length of AC power cables between the PCS and the low-voltage side of the transformer shall be greater than 6 m.
